CAREER OBJECTIVE

Collaborative computer science student with fundamental knowledge of web and software development. Seeking an internship/work position to enhance my passion for developing web and software applications, using the skills gained from various completed courses and personal projects.

EDUCATION

York University, 2023
B.Sc. Computer Science

Relevant Courses Completed: Advanced Object-Oriented Programming, Fundamentals of Data Structures, Design and Analysis of Algorithms, Programming for Mobile (Android), Software Tools (C & Unix)

PROJECTS

Mandir Kothar, Food Inventory Web App - current

- Built responsive web app using React and Node, that allows authenticated users to manage & track food inventory
- Utilized Firebase's NoSQL cloud database, and Hosting to deploy and serve the web app
- Pair programmed with 4 team members, and reviewed and tested code

Mementogram, Simple Social Media Web App - 2021

- Built full-stack web app with React, Redux, and Node/Express, to allow users to interact with other users by viewing, posting, liking, and following social media posts/users
- Tested API requests/responses using Postman

SKILLS

Languages: JavaScript (React), TypeScript, HTML/CSS, Java, C, PHP, SQL/NoSQL

Frameworks: Node (Express), NextJS, Laravel

Technologies: React/Redux, Firebase, MongoDB, Android, Unix, Git, Github

EXTRACURRICULARS

Hack Lassonde @ York University, Mentor & Volunteer (March 2019)

- Streamlined the process of registration, marketing, and logistics for 200+ Hackathon delegates
- Aided hackers with questions about their projects

BAPS, Youth Activities & Program Coordinator (Jan 2014 - current)

- Leading team of 5 volunteers to maintain DBMS, used to effectively analyze, model, and visualize data/statistics to track progress and outlook of youth activities
